PROFILE

First-year Computer Science Engineering student (AI & ML specialization) with a CGPA of 9.06. Currently building foundational knowledge in Python, web development, and programming principles. Strong interest in Robotics integrated with Artificial Intelligence and long-term goal of becoming a full-stack and intelligent systems developer. Actively improving technical skills through consistent hands-on practice and self-learning.

EDUCATION

B.E. Computer Science Engineering (AI & ML Specialization)
Sathyabama Institute of Science and Technology, Chennai
2025 – 2029 | CGPA: 9.06

TECHNICAL SKILLS

Programming	Python (Basic), JavaScript (Basic)
Web	HTML, CSS
Concepts	Programming Fundamentals, OOP (Basic), Logical Thinking
Tools	GitHub, VS Code
Technical Interests	Artificial Intelligence, Robotics with AI, Intelligent Systems

PROJECT EXPERIENCE

- Full-Stack Web Application (In Development)
- Designing structured and responsive user interfaces using HTML and CSS
- Implementing interactive functionality using JavaScript
- Applying Python fundamentals for backend logic and workflow structure
- Organizing and maintaining code using GitHub for version control
- Focusing on writing clean, readable, and maintainable code

ACADEMIC STRENGTHS

- Strong academic performance with CGPA of 9.06 in first year
- Quick learner with high adaptability to new technologies
- Strong analytical and problem-solving mindset
- Highly motivated to build scalable software and AI-driven systems
